- Support All SMS Message Types.
- Transparent Pricing, No Hidden Costs.
- 99.99% Uptime with Backup Solutions redundancy built in.
- Direct SMPP and HTTPS Access.
- Trackable SMS Link
- MMS
- EMAIL to SMS
- EXCEL to SMS

A2P SMS

A2P, or application-to-person messaging, encompasses messages sent from applications to individuals. It covers a wide range of messages, such as marketing, reminders, chat bots, notifications, and OTPs.

2WAY SMS

Two-Way SMS, sent via short codes or long numbers using APIs, effectively engages large customer numbers for sending offers, feedback, fundraising, and appointment confirmations.

SMSC Gateway

Broadnet's hosted Multilanguage platform ensures seamless global SMSC connectivity, supporting various message types with unlimited SMS connections, advanced user and reseller management, high-speed operation up to 9,999 SMS/s with advanced features and innovative reports.

SMS Firewall

Broadnet's SMS Firewall ensures a secure, spam-free messaging environment by filtering MO, MT, and Application traffic with real-time threat detection and configurable blocking rules. Our A2P Monetization feature enhances value for a comprehensive and revenue-efficient solution.

HLR

Using our HLR Lookup tied to the Home Location Register, verify number authenticity, and avoid costs from undeliverable messages. As Low as 0.001X euro/ HLR, available with http, API, SMPP or directly from web portal.

OUR CONNECTIONS

Intelligent routes Exchange
