## -User Tracking Activity Log

The screenshot shows a software interface for managing user tracking activity logs. At the top, there's a toolbar with icons for file operations like Open, Save, Print, and Exit. Below the toolbar is a title bar labeled "Filter1". The main area is divided into several sections:

- Filter Rule:** A table with columns: Description, Condition, Content, Target, Operator, and CaseSensitive. One row is visible: F1, Contains, your code is, pin is, Contains, NO.
- Filter1:** A table with columns: ID, Description, and Content. One row is visible: 1, Filter1, Filter1.
- Checkboxes:** Remove Special, Remove Numeric, Remove Alphabetic (which is checked).
- Buttons:** Add, Update, Remove.

## -Tariff Plans

The screenshot shows the Advanced Messaging System (AMS) interface version 1.0.63. The top menu bar includes: Setup, Sender ID, Messages, Accounts, Contact, Tariff Plan (which is selected), Trunks, Dial Plan, Report, Services, License, and Help. A status message at the bottom left says "Waiting Service... | Layer 4 switch enabled". Below the menu is a toolbar with icons for different functions. The main workspace is currently empty.

# AMS MANUAL SYSTEM

The screenshot shows the 'Incoming Traffic' configuration window. It displays a list of sessions: 'smpp1 (SMPP Port = 981)' and 'SMPP\_IN (SMPP Port = 7777)'. The main panel for 'smpp1' includes fields for 'Description' (smpp1), 'Traffic type' (SMPP), 'Mode' (Transceiver), 'IP Address' (127.0.0.1), 'Port' (981), and 'Add\_NPI' (0). There are checkboxes for 'Auto Reconnect' and 'Use SSL'. A 'System ID' section contains fields for 'System ID' (abc), 'Password' (abc), and 'Routing Table' (Default). Under 'Calculate Cost', there are checkboxes for 'Round', 'Replace URL by short URL', 'Enabled', and 'Allow multiple connection'. The 'System Currency' is set to 'USD'. On the right, a table lists 'SystemID', 'Password', 'Tariff', 'Routing', 'Balance', 'Enabled', and 'M2MConn'. The table data is as follows:

SystemID	Password	Tariff	Routing	Balance	Enabled	M2MConn
abc	abc	2V3-Default	Default	0	V2S	NO
al	al	2V3-Default	Default	0	V2S	NO
is	is		Default	0	V2S	NO

## - Support SMPP/SMPPS client trunk

The screenshot shows the 'Connection Group' configuration window. It displays a list of groups: 'CON1' and 'CON2'. The main panel for 'CON1' includes fields for 'ID' (1), 'Name' (CON1), and 'Description'. There is a 'Silent Time' button. Below this is a 'Connectors' section with a dropdown menu showing 'SMPP\_TEST2' and a list of connectors: 'Connection', 'SMPP\_TEST1', and 'HTTP\_TEST1'. On the left, a tree view shows 'CON1' and 'CON2'.

## -Message Builder Data View

The screenshot shows the 'Message Builder (Database View)' application window. On the left, a tree view lists connections: SS DV, DV2, and DV1. The main area is titled 'DV2' and displays a table of data from the 'testbulk' table in a MySQL database. The table has columns: id, mobile, msg, flag, sender\_id, preresult, and res. The data shows 14 rows of messages, mostly from 'Your Facebook.' with ID 1. The right side of the window shows a query builder with the SQL 'Select \* From testbulk limit 100' and a message preview pane with 'Message Name: DV2', 'Message Content: Number Is : 819493', 'Total Character(s) : 18', and 'Total Message(s) : 1'. A mapping section on the far right maps database columns to message fields.

id	mobile	msg	flag	sender_id	preresult	res
1	46712345678	Number Is : 81.	1	EPL		
2	46712345679	Your Facebook.	1	EPL		
3	46712345999	Your Facebook..	1	EPL

ams_first_login_msn	First Login. Please use fadmin for username and fadmin for password.

The screenshot shows a software window titled "Arabic". On the left, there's a toolbar with icons for file operations like Open, Save, Print, and Help. Below the toolbar, there are two tabs: "Arabic" (selected) and "English". Under the "Arabic" tab, there are several input fields: "اسم" (Name), "العنوان" (Address), "رقم الهاتف" (Phone Number), and "عن الدين إلى البال" (From debt to life). To the right of these fields are checkboxes for "الاسمي" (Name) and "بدل" (Replace). At the bottom of this section are two buttons: "أضف الملف" (Add file) with an upward arrow icon and "استيراد مفاتيح من ملف" (Import keys from file) with a downward arrow icon. Below these buttons is a progress bar showing "35.00%". The main area of the window is a table with two columns: "مفتاح" (Key) and "القيمة" (Value). The table lists various terms and their meanings, such as "about" (بيان)، "active\_now" (شغف الان)، "add" (إضافة)، "addr\_npi" (عنوان NPI)، "addr\_ton" (عنوان TON)، "address" (عنوان)، "alias" (الاسم الsubsidiary)، "all\_service\_enabled" (كل المغيرات مفعلة)، "all\_service\_not\_enabled" (ليس كل المغيرات مفعلة)، "already\_exist" ( موجود، مسبباً)، "ams\_backup\_file" (AMS Backup File)، "ams\_db\_connection" (AMS DB Connection)، "ams\_files" (AMS Files)، and "ams\_first\_login\_main" (amsFirstLoginMain). The table has a footer note: "تم تحميل الملف 100% من 127.1.0.1\...\admin\ams\...amps\2.6.01".

## On each update we be sure to:

- Require Data Validation / Integrity Checks/ Security audit
- Test for Vulnerabilities
- Harden Everything, Internal database, including executables from reverse engineering or code source lookup
- Test each and every feature in the application in addition to be sure to include all fixes for all windows versions
